NCI Metal Depot's Shelters

Tubular Steel Framing System

- Provides protection from the elements for your car, boat, motorcycle, RV...even your patio or pool
- High strength, 2" x 3" galvanized flow coated tubing
- Superior to wood in the fact that steel will not rot, burn, or be infested with termites
- Uniform recessed bend acts like an "H" beam – stronger than any bend in the industry (some bracing required)
- Available in a wide variety of sizes, colors, and designs
- Can be installed on the ground, on gravel or on a concrete pad
- Low cost as compared to other types of construction
- Custom sizes are easily built by adding height and length extensions
- Most framing kits can be packaged to put on the back of a pick up truck
- Environmentally friendly - 67% of all steel is recyclable
- Engineered to meet 130 mph wind loads and snow loads of 30 lbs/sq ft

Storage & Handling of Bundles

NOTICE: ALL PANEL BUNDLES MUST BE INSPECTED AND CARRIER ADVISED IMMEDIATELY IF DAMAGE IS NOTED. IF WATER IS PERMITTED TO ENTER THE BUNDLE, IT IS NECESSARY TO OPEN BUNDLE, SEPARATE MATERIAL AND DRY ALL SURFACES.

PROTECT SHEETS WHILE NESTLED IN BUNDLES:

1. Store bundled sheets off the ground sufficiently high to allow air circulation beneath bundle and to prevent rising water from entering the bundle. Slightly elevate one end of the bundle.
2. Prevent rain from entering bundle by covering with a tarpaulin, making provision for air circulation between draped edges of tarpaulin and the ground.
3. Prolonged storage of sheets in a bundle is not recommended. If conditions do not permit immediate erection, extra care should be taken to protect sheets from white rust or water marks.
